Enhancing Health Care in our Community

## PRACTICE READINESS CENTRE PROJECT

*Educate, Simulate, Innovate, Motivate*

The best way for staff to respond calmly in emergency situations is to be well-trained so they feel confident providing the best possible diagnosis and treatment outcomes. Training scenarios ultimately benefit patients by helping provide quality care gained by keeping medical knowledge current.

The Practice Readiness Centre provides staff of all disciplines the opportunity to learn and practice in a safe setting. The Centre is equipped with a family of computerized mannequins who mimic a variety of scenarios including trauma and other clinical situations. The equipment that is needed for a Practice Readiness Centre will contribute to a realistic learning environment. This will increase skill and result in a high level of patient care.

Invest in your community health care by  
Supporting the Fort Saskatchewan  
Community Hospital Foundation.
